MAXCUT ROTARY PAPER TRIMMER

The **Maxcut Rotary Trimmer** is a cost effective table-top manual rotary trimmer. It comes in 26" - 78" cutting widths and makes quick work of trimming signs, posters, laminated items and other printed media up to 1.0mm thickness. Designed with safety and accuracy in mind, the blade is encased in a plastic housing to protect the user from personal injury; it is a self-sharpening stainless steel blade that saves time when cutting as it cuts in either directions – no need for the blade to be returned to the home position. Accuracy is ensured by the gridded work surface and a transparent clamp strip that makes alignment easy. Repeat cutting is assisted by the lockable backstop. Available in 26", 38", 59" and 78" models. Optional stand and waste catcher on all models except the 26".

Finishing Applications in Stationery, Advertising, Publishing, Security, and much more.
