BINDpro Nova 12MW

Manual Double Loop Wire
Punch / Bind

BINDpro Nova 12MW

The **BINDpro Nova 12MW2** (2:1 pitch) or **12MW3** (3:1 pitch) manual wire binding machine is perfect for all low volume, wire binding requirements. This reliable unit includes both a punch and wire closer. Constructed of hardened steel, dies deliver a clean, precise punch even when working with hard-to-punch materials such as PVC. The closer adjusts to allow for even closure of all wire sizes while a side margin guide allows for evenly centered documents. The efficient design, coupled with a strong metal chassis and quality components makes the BINDpro Nova 12MW stand out as a practical and economical wire binding solution for low volume users.

Finishing Applications in Binding Centers, Printing Centers, Educational and Office
