KSL 320

Manual Creaser

KSL 320

The **KSL 320** is a 12.59" wide all metal construction manual creaser. This desktop creaser comes standard with four (two shown) specially designed side adjustment wheels which act as a paper backstop. A center mounted handle allows the creasing bar to form an even crease from edge to edge. The dual crease bar is simply rotated to select the preferred creasing width. Creasing is very quick and easy to perform with the KSL 320 - simply position the side guide wheels the correct distance from the center bar, choose the width of crease, slide in the paper and you are ready to crease. This heavy-duty creaser, designed and built in Europe, will form consistently high-quality creases on all digitally printed stock up to 400gsm including hard-to-crease laminated prints.

Finishing Applications in On-Demand and Low-Volume Creasing Projects.

Specifications

up to 12.59" Wide
