LAMpro Cheetah S15 Photo

The **Cheetah Photo** allows digital printers to replace the traditional silver halide process with simple embossed lamination. This chemical-free process works by combining special laminate film technology with a high-quality digital print to create photos that retain the look, feel, and weight of traditional Silver Halide photos. But unlike the traditional process, the **Cheetah Photo** is more environmentally friendly — it uses no harmful chemicals — and can lower costs by up to 40%.

Finishing Applications in Digital Print Shops, Photo Studios

Specifications

Min. 7" x 8.25"
Max. 15" x 48"**
