LAMpro Cheetah S15

On-Demand, Professional, Compact
Specialty Finishing Laminator with Flying Knife

LAMpro Cheetah S15

The LAMpro Cheetah S15 laminator and finishing system is designed for on-demand print shops. The semiautomatic feeder works well for short run applications when setting up an automatic feeder would be too timeconsuming. The flying knife sheet separator effortlessly cuts through tough-to-burst films like NYpro™ and thin PETpro™. The micro-adjustable film mandrel allows operators to efficiently adjust the film's position while the machine is running, enabling quick and precise dialing in of the flying knife. The Cheetah is optimized for quick changeovers and features SLEEKpro finishing technology, which allows for variable data foil stamping, spot varnishing, and holographic effects on digital outputs.

Finishing Applications in Stationery, Advertising, Packaging, Publishing, Security, Specialty Finishing (SLEEKpro™) and much more.
